

The Whitchurch Maze

A GUIDE

A complete list of the engraved bricks
and how to locate them

Authors: Sally Woolhouse & Geoff Weir

Date of issue: February 2021

Purpose of this guide

The purpose of this document is to present a complete listing of the engraved bricks in the Maze together with supporting diagrams of the layout, so that every brick can be precisely located.

A brief history

The brick maze in Whitchurch-on-Thames, South Oxfordshire, was designed and turned into reality by local resident, Nick Brazil. He came up with the original idea in 2003. The first turf was cut on Easter Saturday 2004 by Geoff Weir, then Chairman of the Parish Council, and the Whitchurch Maze was officially opened on 27th June 2004.

The project was carried out under the auspices of the Whitchurch Society, the village amenity group. Individuals and local groups were invited to sponsor bricks to offset the costs. They were engraved by The Angle and Squint Co. of Stevenage, Herts. All the work was undertaken by volunteers from the village. Peter Woolhouse laid all the bricks as well as working with Nick on the detailed plans. The engraved (named) bricks were interspersed with blank bricks but family groups were kept together where possible.

The Maze has undergone two restoration projects, the first in 2013 and the second in 2018. Some of the original bricks had unfortunately been damaged by frost, so these were replaced and new bricks were purchased by members of the community. The new ones were used to replace old blank bricks, thus retaining the original layout of the Maze. The bricks used for the 2 restorations were supplied and engraved by EngraveBricks Ltd and they are clay pavoirs rather than clay house bricks. This accounts for the different styles between the old and new 'generations'. The bricks are laid flush at ground level. Out of interest, there are 2,223 bricks in total, of which 646 are engraved, including 35 with paw prints.

A full audit of the bricks was completed in January 2021 and this has made it possible to produce this Guide.

The layout of the Maze

The basic design of the Maze consists of 11 concentric brick circles. 10 of these circles are laid in pairs, forming the pathways for the Maze 'explorer' to navigate in their quest to reach the centre (where a human sundial is installed). Each of these 5 pairs of brick circles is referred to as a **ring**; there is a 6th innermost ring which is a single circle of bricks. Each ring is joined to the next ring by at least one **linking path**. Also, there are 'breaks' in the rings which are called '**stop ends**'. The design is such that there is only one possible route from the starting point to reach the centre of the Maze. This solution to the Maze is not given in this guide – it is for the visitor to discover for themselves.

The referencing system and numbering of the bricks

In order to be able to carry out the audit and produce this guide, it was necessary to first devise a schematic representation of the Maze layout. This is referred to as the 'Schema' and is included here, following this introductory text.

Every section of bricks in the Maze has been given a **location reference** which are shown on the Schema.

The rings are referenced as 'R' and numbered 1 - 6, with number 1 being the outermost. The outer circle of bricks of ring 1 is labelled as R1A and the inner circle of bricks of ring 1 is R1B. The other rings are given references in the same way. With the exception of rings 5 and 6, the rings are broken into sub-sections by 'stop-ends' and linking paths between rings. The sub-sections of each ring are therefore labelled as e.g. R1A/1, R1A/2, etc with the sub-section numbers allocated clockwise. Each section is delimited by a black line on the schema.

The individual bricks in each section are numbered from 1 in a clockwise direction. Only the whole bricks have been numbered; any part bricks, used as fillers, are not numbered and should be disregarded when searching for a particular brick in a ring.

The **linking paths** are simply referenced as L1, L2, etc. and these are shown on the Schema. The bricks in the linking paths have been numbered in a logical order and there are supporting diagrams for each, showing the brick numbers. These diagrams are included in this guide immediately following the table of 'Bricks in Linking Paths' section.

The **stop-ends** are numbered with the ring number they are in and then with a sequential number e.g. S3/2 is the 2nd stop end in ring 3. The bricks in the stop ends have been numbered in a logical order and there are supporting diagrams for each, showing the brick numbers. These diagrams are included in this guide immediately following the table of 'Bricks in the Stop Ends' section.

How to find a particular brick (or bricks)

Every engraved brick in the Maze is listed in the tables set out below (after the Schema). The information that is shown for each brick is: -

- Location reference (as described above)
- Brick number (sequentially numbered clockwise within each section)
- Name or text** as engraved on the brick
- Description of any supplementary symbol or picture
- Year that the brick was laid (with a suffix of R if it replaced an original brick)

Step 1

Search for the name you are interested in by using the standard 'Find' facility for a .pdf document. This should return one or more 'hits' if the name appears anywhere in the guide. For each result found, you will find the location information i.e. Location reference and brick number.

Step 2

Look up the location reference on the Schema – this will pinpoint the section of bricks where the name will be found. The brick number will give you the exact brick position, counting clockwise from the start of the section (for bricks in the rings) or by referring to the appropriate diagram (for bricks in linking paths and stop ends).

Step 3

With the information from Steps 1 & 2 and a copy of the Schema, visit the Maze and you should be able to physically locate the brick(s) you are looking for. It is a good idea to use the Footprints (the Maze starting point) to orientate yourself with the Schema layout.

Examples

1) A search for 'Bertie' will return the table entry as follows: -

R2A/1	19	BERTIE	<i>Paw print</i>	2018 (R)
--------------	-----------	---------------	------------------	-----------------

By referring to the Schema, you will see that the section R2A/1 is part of the outer circle of the 2nd ring and its start point is beside linking path L4. Counting from L4 clockwise, you will find the 19th brick is engraved 'BERTIE' with a paw print. It was laid in 2018 but was a replacement for an original brick from 2004.

2) A search for 'Maggs' will return the table entry as follows: -

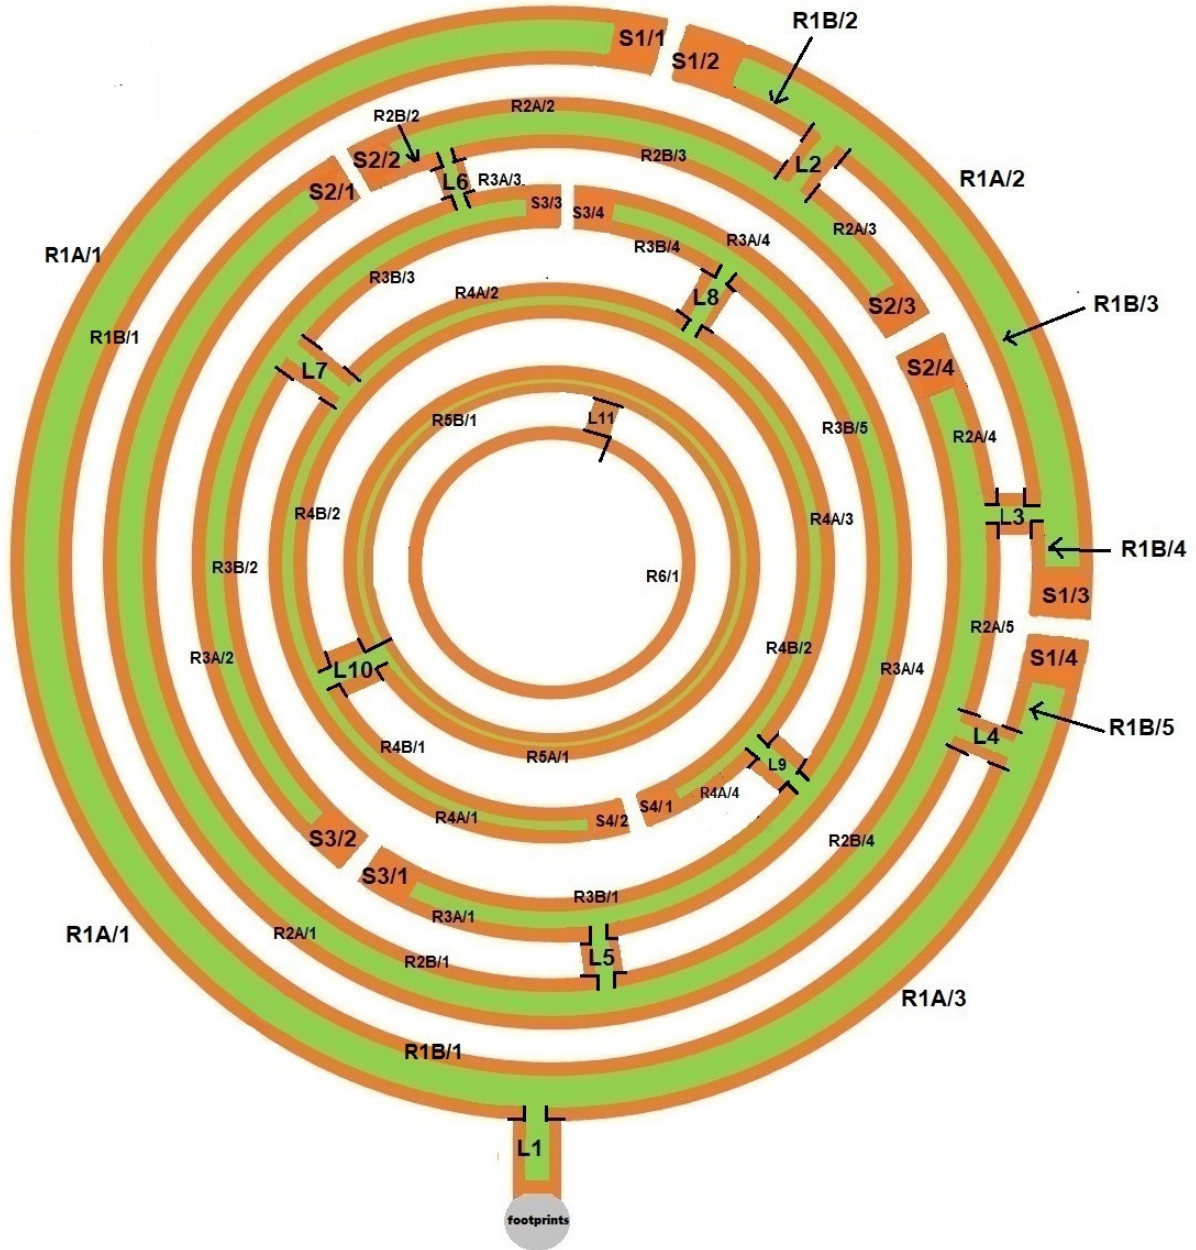

S4/1	1	FRED MAGGS LOCK KEEPER 1956-1983		unknown
-------------	----------	---	--	----------------

By referring to the Schema, you will see that the section S4/1 is one of the two stop ends in Ring 4. Then you will need to refer to the stop end diagram for S4/1 which shows the exact position of Brick 1 (at the end of the block). You will then find the brick for 'FRED MAGGS' (but with no associated symbol). The year it was laid is unknown.

If you have any queries about the Maze installation, please get in touch with Laura Lucas, Chair of The Whitchurch Society via email at thewhitchurchsociety@gmail.com
The Society were involved when the Maze was created in 2004 and it has been decided that they are the most appropriate local group to take over the ownership of all the Maze documentation, including the Audit project, and to keep this Guide updated for future generations.

If you would like to help to keep the Maze area in good shape, there are working parties of volunteers on the first Saturday of each month meeting at 10am during the season. Your help would be very welcome.

THE SCHEMA OF THE MAZE

BRICKS IN THE RINGS: R1A & R1B

Location Reference	Brick number	Name (as written)	Symbol/ Picture	Year
R1A/1	1	-
